Bio methane Gas to Grid
Network entry connections

Application form for Reserving a Connection Point

Northern Gas Network have adopted an approach to support producers from ‘cradle to grave’ during the development of a Bio methane gas to grid project. Northern Gas Network will proactively work with the Producers while they identify, develop, construct and produce their sustainable locally sourced gas projects.

Please contact our Bio methane Team and they will inform you of the initiatives put in place to proactively support the Producers / Developers to successfully flow gas into the network.

Bio methane DN Entry Connections

Application for Reserving a Connection Point

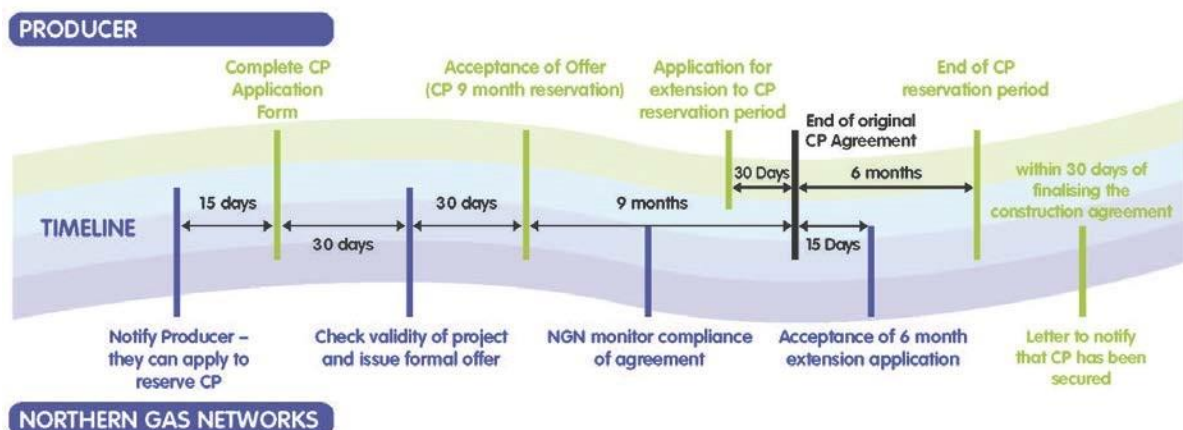

NGN have developed and implemented a process for reserving a distribution network entry connection point for Bio methane projects.

The table below highlights key stages of the process.

Item	Key Stages	Process for NGN
1	At what stage can the Producer consider securing the connection point	Once the Producer has accepted the offer of the design services to be undertaken by NGN and made the upfront payment for same.
2	Is an upfront payment required?	Yes, upfront payment is required
3	Connection point reservation period offered in agreement	9 months
4	Offer acceptance periods	30 Days. On day 31 the offer will be null and void
5	Producer to issue monthly progress updates / reports.	An in-depth list of deliverables / milestones will be developed with delivery timescales for each project. This will be incorporated in to the agreement. Failure to meet will result in termination of the Agreement
6	Extension to Agreement	6 months. Subject to achieving milestones identified in item 5 above.

To ensure NGN are compliant with anti-competition laws, the Producer will have to adhere to very tight fixed time scales within the connection reservation timeline.

Ambition relentless pursuit to be the best

Required Information

Please populate the table below with the information required to undertake the Application for Reserving a Connection Point.

Organisation and Contact Details	
Company / Organisation Name:	Contact Details
Address:	Name:
	Role:
	Tel:
Date of Application:	Email:
Gas to Grid Project Details	
Name of Project:	Site Location:
NGN Project Reference Number	
Please confirm that NGN have been commissioned to undertake design study and an upfront payment has been made	Yes/No If No, Please contact biomethanedoc@northerngas.co.uk If YES - Please proceed with Application
Has AD Plant Planning Application been granted by the Local Authority	Yes / No
If No, at what stage is Planning at, when is it expected	
Have all land access rights been agreed with Land owners	Yes / No
If No, Please provided details of outstanding access rights to be agreed	
Have all wayleaves been agreed	Yes / No
If No, please provide details of outstanding wayleaves to be agreed	
Can the Producer demonstrate that funds for the development of the project have been secured when expected to be secured	Yes/No Date anticipated if No:
Additional Information / Comments - Please provide any additional information that may help NGN in assessing your Application to Reserve a Connection Point.
