

Detailed Design Services Request Form

Bio-methane Gas to Grid
Network Entry Connections

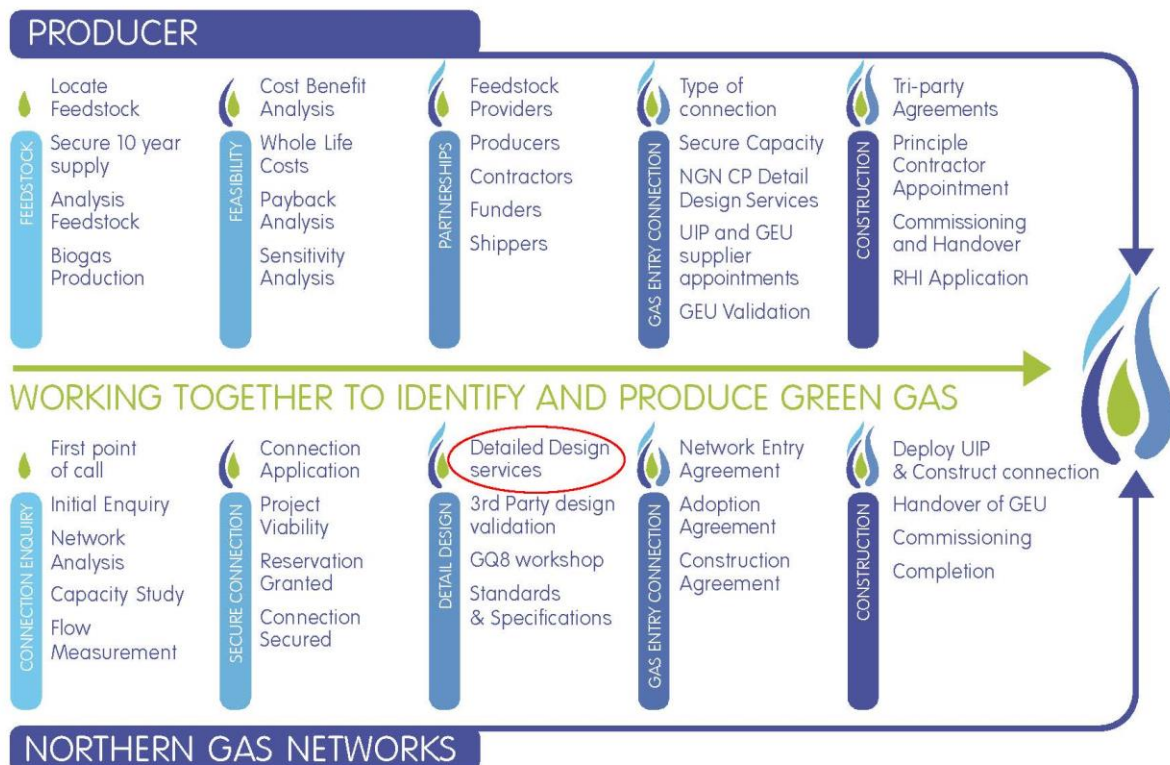

Detailed Design Services Request Form

Insert Project Name and NGN reference

Detailed Design Services.

Northern Gas Network have adopted an approach to support producers from 'cradle to grave' during the development of a bio-methane gas to grid project. From this point onwards, Northern Gas Network will proactively work with the Producers while they identify, develop, construct and produce their sustainable locally sourced gas projects.

Please contact our Bio-methane Team and they will inform you of the initiatives put in place to proactively support Producers and Developers to successfully flow gas into the network.

Contact Us

For strategic advice and for gas to grid delivery process information / guidance please contact

biomethanedoc@northerngas.co.uk

Or alternatively visit Northern Gas Networks dedicated Bio methane website at the following website addresses: www.biomethane.northerngasnetworks.co.uk

Required Information

Please populate the table below with the information required to undertake the Detailed Design Services

Developer / Producer or Project Manager details	
Company / Organisation Name: Address: Date of request:	Contact Details Name: Role: Tel: Email:
NGN Reference Number (same as initial enquiry reference)	Is the Design requirement on Medium, Intermediate or High Pressure Option (As identified from the initial capacity response or the Full Capacity Study)
Gas to Grid Project Details	
Name of Project	Site Location:

Please confirm whether or not a Full Capacity Study has been undertaken on this project?

- Yes
- No

Please select and tick the NGN service(s) that you require.

- Detailed Design validation of the ROV, connection pipe and DN connection

Comments

- Third Party Detailed Design Validation for, MP, IP or HP

Comments

- Gas Entry Unit Design Validation – (Mandatory)

- GQ8 Workshop
