

Initial Network Capacity check form

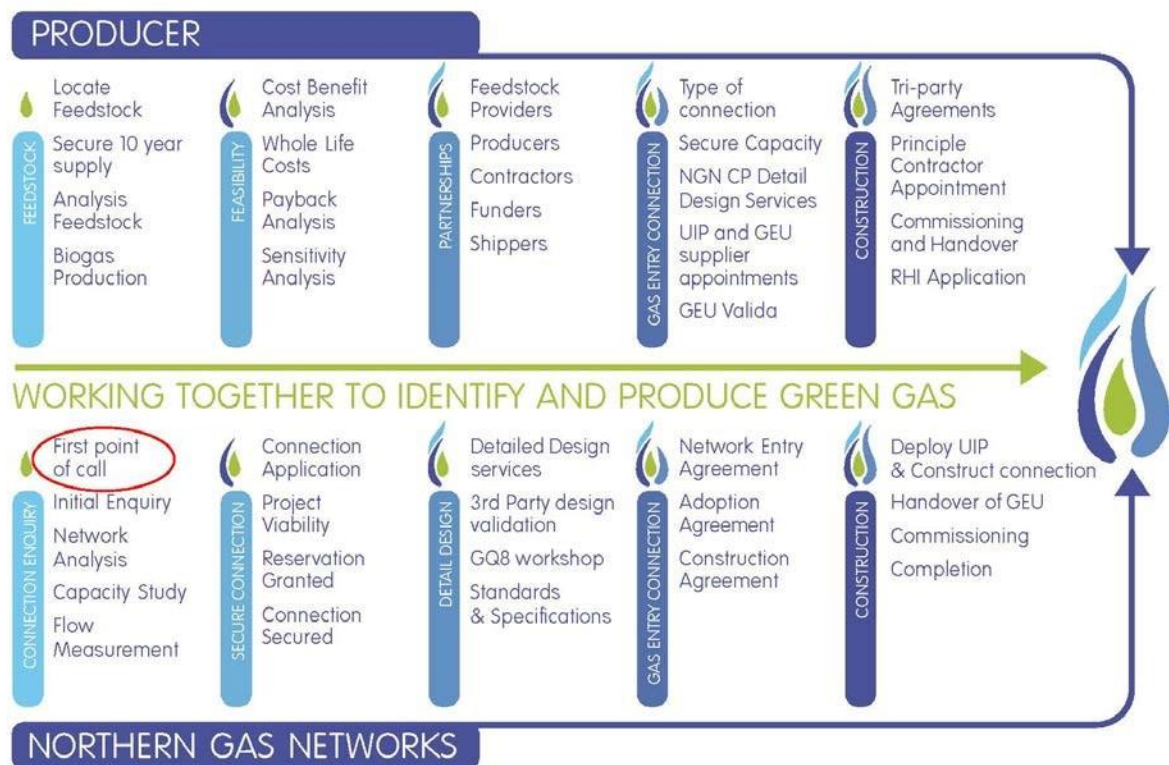

Biomethane Gas to Grid
Network entry connections
Initial DN Entry enquiry form.

Insert project address

Capacity Enquiry

Northern Gas Network have adopted an approach to support producers from ‘cradle to grave’ during the development of a bio-methane gas to grid project. From this point onwards, Northern Gas Network will proactively work with the Producers while they identify, develop, construct and produce their sustainable locally sourced gas projects.

Please contact our Bio-methane Team and they will inform you of the initiatives put in place to proactively support the Producers / Developers to successfully flow gas into the network.

Contact Us

For strategic advice and for gas to grid delivery process information / guidance please contact biomethanedoc@northerngas.co.uk

Alternatively, visit Northern Gas Networks dedicated Bio-methane website at the following website addresses: www.biomethane.northerngasnetworks.co.uk

Bio-methane DN Entry Connections Enquiry Form for Network Capacity Check

Required Information

Please populate the table below with the information required to undertake the network capacity check. **Return to biomethanedoc@northerngas.co.uk**

Developer / Producer or Project Manager details	
Company / Organisation Name: Address:	Contact Details Name: Role: Landline: Mobile: Switchboard: Email:
Date of Application	Reference Number (to be inserted by NGN)
Gas to Grid Project Details	
Name and address of Project.	Site Location: Including Post Code and OS Coordinates. Site is at Easting??? and the Northing??? Nearest Post Code.
Site Description. Please provide any additional information on the site location that would help inform us on your enquiry. ??????????????	Estimated Flow Rate, based on (standard meter cubes (SCM) per hour) 24 hours a day, seven days a week injection: ??? Standard Cubic Metres per Hour (scmh)
Electricity production: Will the project produce electricity for the Grid? If yes, how much is planned ??????????????	Gas Extraction. Will gas be extracted from the same network that Bio-methane is being injected? ??????????????
Partnering Opportunities: Is the Producer / Developer interested in Partnering with other key stakeholders to identify potential projects? ??????????????	Confidentiality: Can NGN share your details with other Stakeholders if your enquiry does not have the desired results? Y/N
Additional Information / Comments - Please provide any additional information that may help us in your enquiry on the proposed Gas to Grid project. ???
